

# Waking up at 10 am is wrong!

It is definitely wrong if...

You stay awake late till night scrolling Tic Tok

You stay awake late till night partying

You know you have a duty to perform yet you

Continue to watch Netflix throughout the night

I will correct myself on this!

It is not wrong, but it is a crime.

Knowing something to be wrong but still committing it for the sake of pleasure

But if you find yourself working late into the night,

Dedicated to achieving your goals

Then, I am proud of you

I always remember my

Struggling Phase

When Nights were late

And Early were mornings

Were a testament to my dedication.

Those moments forged the path to my goals, Instilling Resilience

Today, as I reflect, I carry the lessons of the relentless night.

They were not just hours; they were the foundations of my journey,

The silent architects of my journey – a reminder that

Persistence births Triumphs

Remember the only thing that is keeping you away from your threshold,

Is you itself.

Best

Head Honk
