

# Inculcate Financial Faith

You need to have so much blind faith in yourself to be financially successful.

The faith in yourself should be so much that it becomes delusional.

- It's the delusion that makes you hone your financial education.
- It's the faith that drives you to keep going when things get tough (90% of the world will QUIT at this point).
- It's the desire that will make you financially abundant (Only 1% are).

Having said that, be very careful with the Advice related to “Law of Attraction” especially in terms of Finance.

Listen to me with utmost attention!

I am not professing that “Law of Attraction” is ineffective.

But when I see “GURUS” who claim to be financial educators and assert that “Law of Attraction” is the only key that will unlock their path to success.

I feel enraged, dejected and angry for people who want to get rich fast.

See financial education is a skill that takes months even years to master.

What I am saying is:

You can't just sit around and

- Speak mantras to yourself.
- Visualize financial abundance.
- Pray
- Meditate
- Put up a Vision Board
- Etc.

While taking NO Action on Oneself and expecting to be Successful

It's Nonsense, yet 99% of people fall prey to this facade.

Rich Successful people will follow “Law of Attraction” and still be more successful because they take constant action.

The person who has these 2 combined will propel them from Scarcity to Financial Freedom and Abundance.

Best,

Jimmy Flank.
